PROFESSIONAL SUMMARY

Passionate Software Engineer with hands-on experience in building responsive web and mobile applications using React, Next.js, and React Native. Specialized in AI-integrated solutions, full-stack development with a strong focus on delivering user-centric, scalable products. Driven by curiosity and innovation, with a growing portfolio of real-world projects.

SKILLS

- **Programming Languages:** JavaScript, Python Web **Development:** React.js, Vite, Tailwind CSS
- **Mobile Development:** React Native, Expo, Supabase UI/UX Design: Styled Components, CSS Animations, Custom UI Design **Backend & Database:** Firebase, Supabase
- **Tools**: Git, GitHub

PROJECTS

Portfolio (Live)
- Developed a visually interactive 3D portfolio using **Three.js**, **Framer Motion**, **Tailwind CSS**, and **React**.
- Emphasized **clean UI/UX** and performance optimization for mobile and web devices.

OPTP clone
- A cross platform react-native based clone of the food chain

Restaurant Management System (Desktop App)
- Streamlined restaurant order management, billing, and reporting.
- Built using **Python, Tkinter, Matplotlib**.

Mini Projects
- Amazon Homepage Clone
- Games: Snake, Tic-Tac-Toe, Rock-Paper-Scissors
- Tech: **HTML, CSS, JS, Canvas**

Currently Working on:
- An AI Orthopedic doctor as part of my Final Year Project in collaboration with the industry experts
- Involves machine learning paradigms and real world data engineering

CERTIFICATIONS

- **CCNA: Introduction to Networks – Cisco Networking Academy (June 2024)**
  Concepts: Subnetting, Routing, Switching, Packet Tracer
- **Stanford University's Supervised Machine Learning course (**in progress**)**
